

VINCENT ROBINSON

SOFTWARE ENGINEER

STACK

About

At the core I am a passionate learner who knows learning is an ongoing process. I'm a person who communicates well with others, a hard worker and a person who easily adapts to agile environments. I just happen to be a Software Engineer. Even though I have knowledge of the full stack, with my ability to spot trends and eye for design I would be a perfect addition to any team as a Front End Engineer.

Education

DigitalCrafts | 2020 - Present | Atlanta, GA

- DigitalCrafts is a 16 week FullStack Engineering Immersive Program. Here I learned the Frontend and Backend technologies.

Georgia State University | 2016

- Majored in Business Administration and studied Computer Information Systems.

Experience

PARENTLY |

REPO | <https://github.com/Varobinson/Parently>

DEMO | <https://best-parently.herokuapp.com>

- Parently is a web app that allows parents to sign in and create chore and rewards for their children who have the ability to log into a different Hub
- HTML/CSS, Git, GitHub, JavaScript, Bootstrap, Node.js, Express.js, PostgreSQL, Sequelize
- My Main role for the the project was front-end design/ implementation , connecting templates to the database and javascript functionality

Nada POS |

REPO | <https://github.com/Varobinson/nada-pos>

DEMO | <https://nada-pos.herokuapp.com/>

- Nada is a point of sale system for small businesses like restaurants that keeps mobile in mind. The goal of this system is to save businesses thousands on hardware.
- HTML/CSS, JavaScript, Semantic UI, Node.js, Express.js, PostgreSQL, Sequelize, React.js, Redux, React-Router, Styled-Components
- Nada is a team project. My main role in its development was responsive component design for the front-end and sending requests from our API.

Staddict |

REPO | <https://github.com/Varobinson/staddict>

DEMO | <https://staddict.netlify.app/>

- Staddict is a responsive web app that pulls soccer stats from a REST API
- HTML/CSS, JavaScript, Material UI, Node.js, React.js, Redux, React-Router
- Stadict is a solo project. As an avid soccer fan I wanted to build an application to keep me in the know when it comes to games and how my favorite team is doing.
